Construction

- Mechanical
- Electrical
- Engineering
- Quality Control
- Safety
- Structural/industrial
- Comm. & Residential
- Civil works

Renewables

- Solar
- Wind
- Hydro
- Geothermal

We Add Value to Ec. Dev. Dept's

- Our companies will meet with your Economic Development Department and create and implement an action plan that will benefit and maximize training and employment opportunities for your Nation.

We will:

- Research the opportunities available for each project
- Identify the capacity and skills of Nation members
- Assist with communicating opportunities to those members and assist with matching skills with project
- Identify training and educational programs needed and assist with creation, implementation or expansion of programs.
- Assisting in identifying government or proponent funding available for expansion of programs for employment and training and entrepreneurial support.
- Identify Entrepreneurs of the Nation and provide suitable inclusion for projects- (caterers, janitorial, corporate gifting, artist installations etc)
- Identify Social impact priorities for Nation and include in project negotiation- (priorities may be youth programs, language and culture, educational bursaries, sports programs etc)
- Assist with the creation of customized software to track and measure all Nation inclusion in project

Our Values

A holistic EPC company that is true partner and is constantly developing capacity in these areas of construction and resource development with the following values:

- Protect & honour your land
- Take care of your children & future generations
- Train and Employ your people
- Foster educations
- Maximize & Develop Capacity
- Create Legacies & Careers
- Maximize on social investment
